

**Product FAQ**  
**WELDING GLOVE PRIMER**

When selecting hand protection, consider the application and environment and equip welders with gloves designed uniquely for the welding process used. IRONCAT® welding gloves by West Chester Protective Gear are specifically designed for the unique heat shielding, dexterity and protection demands of Stick, MIG, and TIG welding processes.

<p align="center"><b>STICK</b></p>	<p><b>Maximum Heat Protection and Durability</b> Gloves for stick welding are designed with thicker materials to withstand higher heat. The longer length provides better forearm coverage, while welts protect finger seams against sparks and abrasion. Various materials (split cowhide, elk), linings (cotton, foam insulation) and thumb designs (wing, straight, reinforced strap) are available to suit worker preferences.</p>
<p align="center"><b>MIG</b></p>	<p><b>Enhanced Dexterity and Comfort</b> MIG welding gloves allow for maximum dexterity with an unlined palm, while foam insulation on back of hand provides increased heat protection. Various lighter weight materials are available including cowhide for durability, goatskin for increased dexterity, deerskin for unparalleled comfort, and pigskin which stays pliable even with increased wear and exposure to moisture. Wing thumb designs for open-handed work are available, as are straight thumb designs for better grip. A reinforced thumb strap increases durability in high wear areas.</p>
<p align="center"><b>TIG</b></p>	<p><b>Extreme Precision And Durability</b> Constructed of lighter weight materials, unlined TIG welding gloves allow for maximum dexterity. Goatskin is available for durability and comfort, while kidskin offers unmatched dexterity. For softer feel and comfort, deerskin gloves are available. Wing thumb designs for open-handed work are available, with a straight thumb design for optimal torch grip.</p>

## GUIDE TO CHOOSING THE RIGHT GLOVE

### THUMB DESIGN

WING THUMB FOR A NATURAL FIT AND OPEN-HANDED WORK

STRAIGHT THUMB FOR SUPERIOR GRIP WHILE HOLDING WELDING GUN

### LINING

COTTON LINING INCREASES PROTECTION WHILE KEEPING HANDS COOL

FOAM LINING PROVIDES GREATER INSULATION BY TRAPPING HEAT

### LEATHER

SPLIT COWHIDE FOR DURABILITY AND ABRASION RESISTANCE

ELK STAYS SOFT UNDER HIGH HEAT

DEERSKIN BALANCES COMFORT AND HEAT PROTECTION

PIGSKIN IDEAL FOR WET AND OILY CONDITIONS

GRAIN COWHIDE IDEAL FOR ALL-AROUND WORK
